SUMMARY

Flutter Developer with hands-on experience building mobile applications using Dart, Flutter, BLoC/Cubit, and Clean/MVVM architecture. Skilled in developing responsive UIs, integrating RESTful APIs with Dio and Retrofit, and implementing offline storage with Hive and SQLite. Applied SOLID principles, Repository Pattern, and dependency injection to build maintainable applications. Contributed to six Flutter projects, including two production applications developed collaboratively within a team.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Responsive UI, Cross-Platform Development

State Management: BLoC, Cubit

Architecture & Patterns: Clean Architecture, MVVM, OOP, SOLID, Repository Pattern

Networking & Data: REST APIs, Dio, Retrofit, Firebase (Auth/Firestore), Hive, SQLite

Development Tools: Git, GitHub, get_it (Dependency Injection), Freezed, JSON Serializable, Postman

Additional: Kotlin, JavaScript, HTML5/CSS3, Data Structures & Algorithms, Problem Solving, CCNA Fundamentals

WORK EXPERIENCE

Customer Service Representative — e& Dec 2025 – Apr 2026

- Handled customer inquiries and service requests while maintaining clear communication and professional service standards.
- Troubleshooted customer issues, documented cases accurately, and followed established processes to resolve requests efficiently.

Flutter Mobile Application Developer — Computing Gate Jul 2025

- Developed Flutter application features using MVVM architecture and Cubit state management, applying SOLID principles and code generation tools (Freezed, JSON Serializable) to improve code quality and maintainability.
- Built responsive UI components and integrated RESTful APIs using Dio to support core application functionality.

Freelance Flutter Developer — Project Completed Dec 2024

- Built Flutter application features for a client project using MVVM architecture and Cubit state management.
- Implemented responsive UI screens and integrated RESTful APIs using Dio to support core app functionality.

Data & Perception Systems Specialist — Micro Engineering Technology Aug 2023 – May 2024

- Performed 3D modeling and structured data annotation to support autonomous vehicle perception systems.
- Trained and onboarded team members on annotation workflows and the GULP system, improving consistency across team processes.

Data Processing Specialist — Platinum Jan 2022 – Jun 2022

- Managed high-volume structured data entry under strict verification standards, maintaining data accuracy and integrity.

PROJECTS

PRODUCTION APPLICATIONS

Tajheza — Event Management & Booking Platform [Team Project · Production]

Tech Stack: Flutter, Dart, MVVM, Cubit, REST API, Dio

- Contributed to an event service application featuring package selection, event scheduling, and vendor booking workflows.

Tikla Tamirci Gelsin — On-Demand Services Booking App [Team Project · Production]

Tech Stack: Flutter, Dart, MVVM, Cubit, REST API

- Contributed to a Turkish on-demand services platform connecting users with local technicians through API-driven workflows.

PERSONAL / PRACTICE PROJECTS

Quran App — Audio & Offline Reading Application

Tech Stack: Flutter, Hive, Just Audio, REST API, Clean Architecture

- Implemented offline-first Quran data storage with Hive, audio playback with Just Audio, and remote API synchronization.

Bookly — Book Browsing App

Tech Stack: Flutter, MVVM, Cubit, REST API

- Built a book browsing application with live API integration, error-state handling, and responsive UI.

Weather App — Forecast Application

Tech Stack: Flutter, Cubit, REST API

- Built a weather application consuming live REST API data with state management using Cubit.

Movie App — Movie Browsing & Search

Tech Stack: Flutter, BLoC, REST API

- Built a movie browsing and search application with REST API integration and BLoC state management.

EDUCATION

Bachelor of Computer Science — Thebes Academy, Cairo (Jul 2017 – Jun 2021)

LANGUAGES

Arabic (Native), English (B2 — Professional Working Proficiency)
